

## MANAGEMENT TEAM

The board considers all those who have a role in the recruitment or release of employees to be part of the management team (hereafter referred to as board). The board shall be headed by the superintendent. The superintendent shall convene meetings to discuss school district policies, administrative procedures and other business brought to the superintendent's attention.

The board shall meet upon their own request or superintendent's recommendation to review overall operations of the school district and conditions affecting the management team. In the event a member or members of the board are unable to resolve a problem, a committee of board members and the superintendent shall investigate the circumstances and make a recommendation. If the recommendation does not settle the matter, the board shall meet to resolve the matter. The board may seek the advice of outside management consultants to assist in resolving the matter.
